“A pilgrimage in search of our traditions...”

The Via Francigena is an ancient pilgrimage route that stretches over 1800 km connecting Canterbury in England to Rome. This route was travelled by European pilgrims on their way to the holy places in Rome. Always in close connection with its territory, its traditions, its excellence, we want to celebrate this ancient pilgrimage route through the pages of our catalogue. The route of the Via Francigena, particularly the Siena section, passes through breathtaking landscapes, historic cities and important abbeys that are the historical and tourist heritage of our land.

**‘It is not just a route:
the Via Francigena
is an experience
in search of our
traditions and cultural
resources.’**

The route of the Sienese Via Francigena runs largely through clay soil, which is our raw material. In 2025 the Via Francigena will be celebrating its 30th anniversary since it was proclaimed a cultural itinerary by the European Council.

Celebrating the **Via Francigena**, terracotta, and the pursuit of Tuscan excellence.

For centuries, terracotta has been the protagonist of the details of this route, providing a historical trace to a craft that has been handed down for generations.

In the spirit of the concept of path and tradition, we want to promote the pursuit of excellence in all our spheres, looking to the 'paths' of the past to orientate our future with awareness and an identity totally, and exclusively, made in Tuscany.
Some Tuscan stages of the Via Francigena in the province of Siena.

Welcome to the Catalogue 2025 AnticoMestiere.

A new vision of sales that points to the future.

Sections and news

In order to facilitate reading and the subdivision of the product categories, the catalogue has been divided into heading sections: each colour refers to the section of the product categories of the same name **AnticoMestiere 2025**.

This catalogue was created **with the consumer** in mind to ensure maximum clarity and simplicity in the display of basic product data for quick and effective consultation.

How to read the 2025 Catalogue

Hand-finished

All products marked with the **hand-finished** symbol are designed, manufactured and finished by hand by our specialist potters.

Guaranteed 10 years against frost

All products marked with this **blue** symbol are guaranteed for 10 years against frost and weathering. This material can withstand temperatures down to -20° C.

new

New in 2025

All products marked with this **red** symbol are new in the AnticoMestiere 2022 catalog and are often grouped into categories.

Follow **Antico Mestiere**:

Minimum orders and warranties

In the event that the product travels with the **FREE DOMICILE** clause - reminding you that any breakage must be communicated to the company within and no later than 5 days from unloading, subject to a written reservation to be noted at the time of delivery on all transport documents - we inform you that, as from the entry into force of this catalogue, no refund will be granted if the minimum quantity ordered is not equal to or a multiple of the quantity indicated in the TABLE under the heading **PIECES PER BOX**. Compliance with the **MINIMUM ORDER** and the procedures for notifying the company of any faulty goods will ensure that the goods will be refunded; consequently, faulty goods must be proven by photographs and sent to the company. Finally, it will be refunded by issuing a credit note, subject to authorisation by our agent who will inspect the disputed product at your point of sale.

Warnings: the durability of the products for the times indicated depends on their correct use. Obstructing the water drainage holes in the bottom of the pots or placing them directly on the ground can cause premature deterioration of the material. Please be careful and, if necessary, ask your retailer for the information you need to use the products correctly.

Abbazia di **S. Salvatore all'Isola**
Abbadia Isola (Monteriggioni)

INSTRUCTIONS

Instructions to follow for a correct maintenance of **terracotta pots**.

Our terracotta pots are made from the precious clay of the Sienese hills. The processing, carried out with traditional techniques and the cooking carried out at temperatures over 1000 ° C, gives the product a resistance to frost down to -20 ° C. To obtain the maximum duration that our terracotta can offer, however, it is appropriate to follow some indications.

- 1 Empty the pot from water in the winter period and in any case when the temperature falls below 3° C and make sure that the rain does not fill the objects again.
- 2 In the case of clays filled with soil, make sure that the drainage hole is always free and not obstructed by roots, soil or other objects.
- 3 In items used as pot holders, make sure there is no stagnant water inside and empty them if necessary.
- 4 The saucers used to collect water from watering, it is good care to turn them upside down when the temperature drops below 3° C. Do not leave the pot in a continuous water bath, but lift it with terracotta spacers.
- 5 Use extreme caution when moving objects when frozen because the bottom of the pot may be stuck to the ground. Do not use boiling water on pots to melt ice or snow, nor substances such as salt or similar products.
- 6 It is preferable to use feet under the pots to separate them from the ground
- 7 If the pot is moved indoors, it is better to cover it with a burlap bag or TNT sheet so that it can be protected from cold and humidity.

Guidelines for proper maintenance of **terracotta pots**

If the pots are stained with grass, you can clean them by brushing them with water and vinegar. For nastier adversaries, such as fungus or moss, it is recommended to use bleach applied with a brush and rubbed in with a hard nylon bristle brush. Leave it on for a few minutes and rinse with warm water. If the effect is still not as desired, repeat the operation several times.

Many productions, one essence.

In the catalogue, you will find products from the classic Tuscan craft tradition and articles from other countries that come together to create the brand **AnticoMestiere**.

AnticoMestiere & Co, always innovative both in its models and in the choice of materials, it also makes use of synergies from other countries to better respond to an increasingly dynamic and demanding market, without ever neglecting the history and tradition of the product.

To help you in your choice, we indicate next to each photo the provenance of the vase for greater transparency.

Galestro

The brand that has always recognised **ABSOLUTE QUALITY** in the field of terracotta production.

For centuries in homes all over the world, these clays have been used for fine floor and interior finishes.

The vase acquires an absolute value over time, so much so that we consider it **for life**.

Galestro by

Drawing on the skill and experience of master potters who have been working in the field for centuries, **Terrecotte di Trequanda** has been producing traditional Tuscan vases since 1989.

Each article has its own story, the details are different, as are the defects that characterise the product, making it **UNIQUE**.

IMPRUNETA

Every article bearing the **AnticoMestiere Impruneta** mark is made from the fine Impruneta clay from the **Florentine** territory. Impruneta terracotta differs from other types of terracotta due to the chemical composition of the clay. The marl makes the product highly resistant to frost and all other weather conditions. These qualities make **Impruneta terracotta a product of the highest quality**.

TerrArte

Production by our company in Romania. The clays are of good quality and give the product a guarantee of **ANTI-FREEZE**. The technology used makes the **LINEA TERRARTE** a product that, thanks to its quality/price ratio, stands out in the high-volume market, while maintaining high quality.

Galestro

TREQUANDA

passions and emotions

The brand Trequanda

The land that becomes art.

Taking advantage of the skills and experience of master potters, who have been working in the sector for centuries, Terrecotte di Trequanda has been producing pots in the Tuscan tradition since 1989.

In the last few years the market demands have directed the study of new lines on more sober and minimal shapes giving life to the MODERNE line.

The processing is done by hand with plaster molds and since 2018 uses only GALESTRO synonymous with ABSOLUTE WARRANTY IN TIME.

Each item has its own story, the details are different, as well as the defects that characterize the product, making it UNIQUE.

“We take from
Nature only
what we can
return...”

Danilo Bruni
Chief Executive Officer

100%

eco

**Eco-friendly and totally
recyclable products.**

By purchasing an AnticoMestiere
product you become a friend of the
environment. We want to make the
world a better place to live, which is
why we only take from the Nature
only what we can return.

The **natural** characteristics of our products.

AnticoMestiere product lines have always been made with respect for the environment. Our goal is to give back to Nature all that she gives us, day after day.

Production of pots with low environmental impact

We work over 100 quintals of clay every day respecting the environment and the territory. Earth, water, air and fire are the four natural elements that we live every day. Support them, respect them and benefit from their energy has always been our goal.

-95% emission of Volatile Organic Compounds (VOCs)

In our products that are not made from terracotta, or in our brand-new colored terracotta, we use only water-based paints, which allow us to reduce by 95% the emission into the environment of VOCs (Volatile Organic Compounds), powders that are sometimes the main cause of allergies and skin irritations.

The power of the Sun

For 3 years we have equipped our structure with photovoltaic panels, managing to reduce the use of electricity by replacing it with a renewable energy source.

A low environmental impact market

Making eco-friendly products ensures that we can be appreciated by markets that adopt green philosophies.

We process over **100q** of **clay** every day according to **sustainable standards**.

i

The Tuscan route of the Via Francigena

Abbazia di S. Salvatore all'Isola

(Abbadia Isola)

The site of the monastery which, as its name reminds us, was once surrounded by water was chosen mainly for its strategic position controlling the Via Francigena, of which Borgonuovo (later Abbadia Isola) was already a stopping point at the end of the 10th century. During the following centuries, one of the main functions of the abbey continued to be that of a hospital, i.e. shelter and hospitality for travellers on their way to Rome.

The Tuscan route of the Via Francigena

San Quirico D'Orcia

The collegiate church of Saints Quirico and Juliet is a beautiful church with three portals in Romanesque style, built on the remains of an ancient parish church. On the right-hand side, two portals can be seen that were added later on the Via Francigena.

The details that connect us...

The frontals and rose windows of churches were the inspiration for the decorations that we still find today in our Classical production...

The Tuscan route of the Via Francigena

Vignoni Alto

Travelling along the Via Francigena we come across spectacular views, enchanting scenery made up of sinuous hills and medieval villages. We encounter the heart of Tuscany filled with pretty hilltop villages.

The Tuscan route of the Via Francigena

Bagno Vignoni

We left San Quirico d'Orcia behind to reach the village of Bagno Vignoni, known the world over for its elegant central square. The protagonist is the large medieval pool overlooked by Renaissance buildings and the loggia of St Catherine of Siena. Thanks to its proximity to the Via Francigena, the waters flowing here were used since Roman times for thermal purposes. As the sun sets, the water vapours rise, providing a timeless setting.

i

The Tuscan route of the Via Francigena

Chiostro di Abbadia Isola

In this place, it is possible to retrace the history of the Abbey (page 2) and its Cloister, as well as to see the reconstruction of a member of the Franzesi family (last of the lords of Staggia, who was influential on Abbadia) buried with his jewellery in the Cloister itself. Recently, an archaeological museum was opened in this part of the Cloister..

**Collegiata dei Santi
Quirico e Giulietta**
(San Quirico D'Orcia)
